Create storyboards to represent the user flow for a mobile app (e.g., food delivery app) using Balsamiq

AIM:

The aim is to create storyboards representing the user flow for a mobile app, such as a food delivery app, using Balsamiq.

Procedure

1. **Tool Used**: Balsamiq Wireframes (https://balsamiq.com)

2. I created a new project and added mobile screens to show how a user would interact with the app from start to finish.

3. Each screen represents a key step in the food ordering process.

4. UI components like buttons, text boxes, images, and forms were used from Balsamiq's built-in library.

5. All screens were kept minimal and clear to focus on usability and navigation.

User Flow

1. **Home Screen** – The user can search for restaurants, browse by cuisine (like Indian, Italian, Chinese), and view dishes to add to cart.

2. **Cart Screen** – Displays all selected food items with a total price and a button to proceed to checkout.

3. **Checkout Screen** – The user fills in their delivery details and selects a payment method (UPI or Credit Card).

4. **Order Confirmation Screen** – A summary of the order is shown, with estimated delivery time and a final "Place Order" button.
